

Quin Richards

UX & GAME DESIGNER

Los Angeles, CA · quinrdesign@gmail.com · [linkedin.com/in/quin-richards](https://www.linkedin.com/in/quin-richards) · quinrichards.com

UX and game designer who turns undefined problems into shipped experiences. I generate a lot of options, put them in front of players and users, and iterate from sketch to prototype to shipped — across game UX, interactive product design, and live production. Currently consulting on UX for two unannounced titles at Digital Eclipse.

EXPERIENCE

Digital Eclipse — UX Design Consultant

UNDER NDA

JUL 2026 — PRESENT

- Consulting on UX for two unannounced titles close to release — one single-player, one multiplayer. Work spans menus, settings, core gameplay decisions, and VFX / impact moments across both.
- Author the UX documentation behind those decisions, build the user flows, and assist in playtests with players selected by the QA lead.
- Fight for the player through launch — arguing the player's case against schedule, scope, and technical constraints.

Stellar Agency — UX Designer

JUL 2026 — PRESENT

- Leading an early prototype for a new platform for freelancers, proving the core flow works before it scales.
- Created a wide variety of screen flows and use cases to pressure-test the concept from several angles and showcase it — end-to-end product UX, from framing the problem to iterating on the structure that held up.

The Walt Disney Company — UX Designer & Rapid Prototype Engineer

OCT 2025 — APR 2026

- Identified an unmet workflow need for writers across Disney's creative banners through self-initiated research.
- Explored several directions for the tool, then designed and built the prototype that was greenlit and company-backed within weeks of first pitch.

Beamdown — Lead Designer & Production Coordinator

AUG 2024 — MAY 2025

- Led design across a 30+ person team from pre-production through public Steam launch — set the design pillars and core loop, then owned combat, boss, and level design against them.
- Ran production across design, art, engineering, narrative, and QA so no discipline sat blocked on a decision.

University of Utah Esports — Program Coordinator & Broadcast Producer

AUG 2022 — MAY 2025

- Coordinated live tournament broadcasts for a 20-30 person team, streaming regional events to a live Twitch audience — designing what the spectator sees and when.
- Built and coached a competitive Rainbow Six Siege program at Santa Barbara City College.

Riot Games — Research Team Lead (student research program)

JUN 2018 — JUL 2018

- Led a student research team feeding structured findings into League of Legends development; coordinated deliverables across QA, social, and marketing and delivered a final competitive-analysis piece.

SELECTED PROJECTS

Eldritch Confection
Game, Combat & UX Designer — 2D side-scroller shipped with a 5-person team in one month. Owned the weekly playtest survey (~25 responses) and turned the patterns in it into combat changes.

My Brother's Lightkeeper
Designer, Narrative & Producer — two-person narrative sailing game about community and hope; owned design, UX, narrative, art, and audio.

Cue
Concept & Interaction Designer — eyes-free controls for headphones you can't see. A gesture language, paired haptic + audio cues, and a working browser prototype.

Project Futura
Designer — first-person narrative platforming puzzle game, currently in prototype with a small indie team.

EDUCATION

University of Utah
B.S., Game Development

Santa Barbara City College
Psychology & Philosophy

SKILLS & TOOLS

DESIGN	UX / UI · User flows & information hierarchy · Hierarchy of controls · Accessibility · Game & systems design · Narrative design · Rapid prototyping · User research & playtesting
PRODUCTION	Cross-disciplinary collaboration · Project coordination · Scheduling & scope · Live broadcast production
TOOLS	Figma · Miro · Unity · Unreal Engine 5 · Cursor · Jira · Perforce · Asana · GitHub · Notion · OBS
