Quin Richards

UX + Game Designer | Experience Designer

Los Angeles, CA
quinrdesign@gmail.com
linkedin.com/in/quin-richards

UX and game designer who obsesses over what an experience feels like from the player's side. I find the moment people get confused, then build the prototype that fixes it, usually with sound in it. Lately that means UX for Digital Eclipse, product design for Stellar, and a greenlit prototype at Disney before that.

EXPERIENCE

Digital Eclipse
2026 – PRESENT

UX Consultant (contract)

- Started with UX feedback on *Mortal Kombat: Legacy Kollection*, an early deep dive into how the studio builds its interactive game histories.
- Now consulting on VFX and gameplay UX for *Godzilla*, flagging where clarity, feedback and feel break down for players.

Stellar
2026 – PRESENT

UX / Product Designer (contract)

- Designing the UI and design system for Profile, a new platform heading into an invite-only alpha with Stellar's partners.
- Took the UI from several competing directions to one final system the team is now building on.

Apple
2026 – PRESENT

Specialist, Apple Store

- Help customers choose, set up and learn their devices one on one, often first-time users meeting iPhone, Mac or accessories for the first time.
- Front-row, daily view of how real people experience Apple's interfaces and where they get stuck. I bring that straight back into my HI and UX work.

The Walt Disney Company
OCT 2025 – APR 2026

UX Designer & Rapid Prototype Engineer

- Identified an unmet workflow need for writers across Disney's creative banners through self-initiated research.
- Designed and built a working prototype that was greenlit and company-backed within weeks of the first pitch.

Beamdown (Steam)
AUG 2024 – MAY 2025

Lead Designer & Production Coordinator

- Led design across a 30+ person team from pre-production through a public Steam launch (87% positive).
- Owned combat, boss and narrative direction alongside schedules, deliverables and cross-discipline alignment.

University of Utah Esports
AUG 2022 – MAY 2025

Program Coordinator & Broadcast Producer

- Produced live tournament broadcasts with a 20 to 30 person crew, streaming regional events to Twitch.
- Before Utah, founded and coached a competitive Rainbow Six Siege program at Santa Barbara City College.

Riot Games
JUN – JUL 2018

Research Team Lead, student program

- Led a student team turning QA, social and marketing feedback into structured findings for League of Legends.

SELECTED PROJECTS

Cue
Interaction designer. Eyes-free gesture and haptic language for Beats headphones, with a working 10-screen prototype.

Eldritch Confection
Game, combat & UX designer. 2D action game shipped on itch.io with a 5-person team in one month.

Recruit Ops
Experience designer. Turns a 35-minute Avengers Campus queue into missions, with an iPhone Duo version. Self-initiated concept.

Project Futura
Co-founder & vision holder. First-person co-op game at a cheery megacorp, in production.
